UDAI VARMA K M

Kerala, India | +91 9567566119 | udaivarma12@gmail.com | linkedin.com/in/udaivarma-k-m | github.com/UdaiV

Professional Summary

Motivated and detail-oriented technology professional with experience as IT Admin, **Python programming**, problem-solving, and web development. Passionate about building efficient and scalable software solutions using modern development practices and **OOP** principles. Skilled in developing, debugging, and maintaining applications while ensuring code quality and performance. Continuously learning and expanding technical expertise to grow as a **Software Engineer** and deliver impactful results.

Technical Skills

Primary Languages: Python, SQL, HTML, CSS, JavaScript, Dart
Software Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms, Software Design Principles
Tools & Frameworks: Git, GitHub, VS Code, Django, Flask, Flutter, PostgreSQL/SQLite
Methodologies & Practices: Code Reviews, Software Documentation, Debugging & Troubleshooting

Professional Experience

IT Admin Aug 2026 – Present
New Opportunity Consultancy Pvt Ltd (NOCPL) *Coimbatore, India*

- Administered user accounts, Active Directory, and access permissions. Utilized **Python** programming for Telegram support automations.
- Provided technical support and troubleshooting for hardware, software, and network issues.
- Managed network infrastructure including routers, switches, firewalls, and VPNs.
- Supported defect resolution and bug-fixing efforts by applying systematic **debugging and troubleshooting** techniques, ensuring timely software releases.
- Created and maintained technical **documentation** for newly built modules to support future maintenance, onboarding, and updates.
- Automated reporting and documentation using Microsoft Excel, improving accuracy.

Quality Assurance Executive May 2025 – Jul 2026
Kaynes Technology India Limited *Chennai, India*

- Inspected wiring harnesses for defects such as damaged insulation, improper crimping, or incorrect pin alignment, ensuring adherence to quality standards.

Key Projects

Full-Stack Job Portal Web Application | *Python, Django, SQL, JavaScript, HTML5, CSS3* Jan 2026 – Present

- Architected a responsive full-stack job portal using Django (MVT architecture) alongside HTML5, CSS3, and JavaScript to manage multi-role workflows for job seekers and recruiters.
- Designed relational database schemas in SQL to efficiently manage user profiles, job listings, application pipelines, and resume submissions.
- Implemented core platform features, including role-based access control (RBAC), user authentication, dynamic job search/filtering, and application status tracking.
- Structured modular Django apps and views to handle HTTP request/response cycles and server-side template rendering.
- Prepared backend architecture for scalable expansion, structuring database models and view logic to support upcoming RESTful API migration via Django REST Framework (DRF).

Custom Web Document Converter | *Python, Flask, OOP, Git* Apr 2026

- Developed a user-friendly **Flask-based** web application for converting Excel, CSV, and PDF documents into TSV and PDF formats using **Python**.
- Designed and implemented a scalable Python service adhering to SOLID software design principles.
- Implemented custom algorithms to optimize file processing times during conversion routines.
- Utilized **Git** for version control, managing code branches, and facilitating clean pull requests.
- **GitHub Repositories:** Doc-to-PDF | Doc-to-TSV

Education

Bachelor of Technology in Electronics and Communication Engineering Mar 2021 – May 2025
Rajadhani Institute of Science and Technology *Palakkad, Kerala*

- **CGPA:** 8.02 / 10.0
